LECTURE 5 & 6: NORMALIZATION OF DATABASE TABLES

**DATABASE DESIGN USING BOTTOM-UP APPROACH
(NORMALIZATION TECHNIQUE)**

Exercise 1

2. The following **CustomerRental** table describes the book rental process in a book shop. A customer is allowed to rent more than one book at a time. Assume that a customer can only rent the same book title once.

Draw a dependency diagram based on the table and identify and label the partial and transitive dependency in the diagram.

CustomerNo	CustomerName	DateOut	DateReturn	BookNo	BookTitle
CR76	Suraya	13-May-2013	20-May-2013	B2223	My Home
CR56	Hanani	13-May-2013	19-May-2013	B3349	The Myth
CR56	Hanani	13-May-2013	19-May-2013	B0055	R2d2
CR74	Wilson	13-May-2013	21-May-2013	B0123	Music Pro
CR76	Suraya	1-Jul-2013	5-Jul-2013	B0015	Harry Potter

Exercise 2

A book is identified by its ISBN number, and it has a title, a price, and a date of publication. It is published by a publisher, which has its own ID number and a name. Each book has exactly one publisher, but one publisher typically publishes multiple books over time.

A book is written by one or multiple authors. Each author is identified by an author number and has a name and date of birth. Each author has either one or multiple books.
